

STORIS' Furniture Software Can Solve Your Furniture Problems

When designing a house, there are many factors that need to be taken in to consideration. From the consumer's point of view, these include the best location, the color of the paint, choosing the surrounding environment and the best accessories, to name a few. One other very important consideration is, of course, the furniture!

However, furniture retailers take into account more than just the houses accessories. Companies in the retail furniture industry make it a point to ensure timely delivery of their product to warehouses. Imagine organizing shipping and receiving for sofas, beds, chairs, tables, and more manually! STORIS can help you cut down on the logistics nightmare and help solve your furniture businesses' problems with their furniture software.

For more detailed information about the software and its numerous uses, visit www.storis.com
